SUMMARY

Computer Science undergraduate with hands-on experience in building AI-integrated Java web applications using Servlets, JSP, and MySQL. Currently expanding into cloud-native development, with exposure to AWS fundamentals, containerization (Docker), and distributed system concepts. Strong in backend development, and building scalable and maintainable applications.

SKILLS

Programming Languages: Java (SE, JEE), SQL, Python, HTML, CSS
Backend & Databases: Java Servlets, JSP, JDBC, MySQL
Cloud & DevOps (Basics): AWS, Docker (Basics), CI/CD Concepts (GitHub Actions – Basic Workflows)
Tools & Core CS Fundamentals: Git, GitHub, Apache Tomcat, Maven, Data Structures & Algorithms, OOPs, DBMS

PROJECTS

FindNext – AI-Powered Java Web Application | GitHub Link |findnext.works Dec 2025
Java (Servlets & JSP) | MySQL | Apache Tomcat | JS | HTML | CSS

- Engineered a full-stack job portal featuring Role-Based Access Control (RBAC) for admins, employers, and candidates using Java Servlets, JSP, and JDBC.
- Architected end-to-end workflows for job lifecycle and application tracking, ensuring secure Session Management.
- Integrated Affinda API to automate resume parsing, reducing manual screening time by 40%.
- Designed the system with a scalable backend architecture and explored cloud deployment aligning with distributed system and cloud-native design principles.

Syntax.AI - AI-Driven Code Assistance Platform | GitHub Link Aug 2025
Java (Servlets) | MySQL | Apache Tomcat | REST Integration | Gemini API | JS | HTML | CSS

- AI Engine: Integrated Gemini API for automated code debugging, refactoring, and multi-language translation.
- Developed an MVC backend with Java and REST APIs, ensuring secure user authentication.
- Automated documentation features, saving users an average of 15 minutes of manual code documentation.
